WORK EXPERIENCE

Benefits Interns • Internship

Sep 2024 - Present

Vensure Employer Solutions, Noida

Our team at Vensure Employer Solutions is focused on leveraging analytical prowess to navigate the complexities of HR benefits. As a Benefits Intern, I actively apply the computer engineering principles I'm mastering at Bennett University, aiming for a BTech completion in July 2025. This role aligns with my educational focus on Computer and Information Sciences, where I am expected to graduate by this may.

Full Stack Development • Internship

Jul 2024 - Sep 2024

Fyle, Virtual

Doing help in developing the web site and all other bug fixes

PROJECTS

[SIGN DETECTION APLLCATION ↗](#)

Apr 2024 - Jun 2024

Communication is a process of various types such as exchanging or sharing of information, ideas, or feelings. But, on the other hand, with speech being universal, it just is not effective for the deaf and mute population. They communicate using sign language that could be intricate to the native tongue of the audience who will not know the sign language.

The way to overcome this obstacle may be an recognition model based on machine learning that can be applied to sign language. Using our approach we are going to produce an Indian Sign Language dataset with the camera after that we will train a tensorflow model by using transfer learning. The aim here is to follow the different gestures done in sign language and to do an instant translation of them as English

[ANGULAR BASED WEBSITE ↗](#)

Mar 2024 - Apr 2024

Made the angular based Github Repositories listing Page. as i have attached the link in github

[HAcktools ↗](#)

Sep 2023 - Dec 2023

- Built an extension using javascript language in which we can use it for the site information that the site is real and also can hack the site.

[MEDINET APPLIACTION ↗](#)

Apr 2021 - Apr 2022

MEDI NET APPLIACTION IS MADE WITH PYTHON LANGUAGE NOT FULLY PUBLISHED BUT PROPERLY WORKING .IT IS MADE USING WEBSCRAPPING
